LuxaLight Industrial LED Fixture Polarised cover Near Infrared 860nm 24.2x16mm (24 Volt, 2835, IP64)

LF-24-860-24.2X16-POL

Version: 2025-02-26.1

Product description

The **LuxaLight Industrial LED Fixture** is designed for intensive industrial applications that require high radiation intensity for a wide range of processes. With **860nm near-infrared (NIR) radiation**, this LED fixture provides a reliable and efficient solution for industrial processes that benefit from **near-infrared radiation**, such as material curing, photochemical reactions, and quality inspection.

The fixture is made from a **durable aluminum housing**, ensuring efficient heat dissipation and long-lasting performance. The **polarized cover** offers protection against dust and moisture (IP64) and provides the flexibility to choose the radiation beam angle between **30°, 60°, 90°, or 120°**, depending on your specific application needs.

Key Features:

- **860nm Near-Infrared Radiation:** The **860nm wavelength** is ideal for industrial applications requiring **near-infrared radiation**, enhancing processes such as material curing, photochemical reactions, and quality inspection.
- **Polarized Cover (IP64):** The fixture features a **polarized cover** providing protection against dust and moisture (IP64), and offers a choice of radiation beam angle: **30°, 60°, 90°, or 120°**, depending on the application.
- **Aluminum Housing:** The durable **aluminum housing** ensures optimal heat dissipation, contributing to stable and long-term operation.
- **24V Power Supply:** The fixture operates on a reliable 24V power supply, ensuring stable and consistent performance, ideal for demanding industrial applications.
- **Integration with MaNima Pollux Industry Pulsing (Strobing):** The LED fixture supports integration with the MaNima Pollux Industry System for pulsing (strobing), significantly increasing radiation intensity. This feature enables faster reactions and enhanced efficiency in industrial processes.
- **Real-Time Temperature Monitoring via NTC Sensor:** The integrated NTC sensor allows continuous temperature measurement and adjustment via the MaNima Pollux Industry System. This helps maintain the optimal operating temperature for maximum radiation output and consistent performance.

Industrial Applications:

- **Material Curing & Hardening: 860nm near-infrared radiation** is commonly used in the curing process of coatings, adhesives, and materials that respond to infrared radiation, accelerating curing times in production environments.
- **Photochemical Processes:** The **860nm wavelength** can be used in industrial and scientific environments where specific photochemical reactions are required, accelerating reactions in laboratories or production lines.
- **Quality Control & Inspection: 860nm NIR** is ideal for inspecting materials or products for defects or irregularities in industrial environments, improving quality control.
- **Food Processing & Sterilization:** The fixture is used in food production for sterilization and pasteurization, enhancing food safety and processing efficiency by delivering consistent near-infrared radiation.
- **Non-UV Material Curing & Hardening:** The **860nm radiation** is used for curing various materials that do not require UV light but benefit from NIR wavelengths, such as plastics, rubbers, and other composite materials, speeding up the curing process.
- **Natural & Artificial Drying:** The **860nm wavelength** helps dry a wide range of materials such as paper, textiles, and wood, by accelerating moisture evaporation without damaging the product. This is especially useful in printing and textile industries.
- **Metal & Material Processing: 860nm NIR** is applied to improve the properties of coatings or accelerate the curing of certain materials, reducing processing times in manufacturing and enhancing efficiency.

Benefits:

- **High Radiation Intensity for Faster Processes:** The fixture can pulse with the MaNima Pollux Industry System to increase radiation intensity, reducing processing time and increasing productivity in industrial applications.
- **Real-Time Temperature Monitoring for Consistent Performance:** Continuous temperature monitoring with the integrated NTC sensor helps maintain optimal operating temperatures, preventing overheating and ensuring a longer lifespan for the fixture.
- **Industrial Durability:** The **aluminum housing** provides a robust and durable construction, capable of withstanding the challenges of harsh industrial environments, while the **polarized cover** ensures protection against dust and moisture, increasing the fixture's reliability.
- **Efficiency & Speed:** The LED fixture delivers efficient performance, with quick and reliable operation contributing to increased productivity and processing efficiency, essential for industrial production systems.

Technical specifications

General	
Brand	LuxaLight
Application	Hyper - spectral Imaging Machine Vision
LED type	2835
Material	Aluminum
Dimensions	220 × 24,2 × 16 mm
Mounting	Surface mounted
Cover type	PMMA Polarised transparent
LEDs per piece	108.00
Lighting	
Wave length	860nm
Measurement results	

Irradiance

Value	Measuring distance
283 W/m2	50 mm
139 W/m2	75 mm
88 W/m2	100 mm
26 W/m2	200 mm
13 W/m2	300 mm
7,9 W/m2	400 mm
5,2 W/m2	600 mm

Electronics	
Working voltage	24V
Current per piece	1.25 A / piece
Power consumption per piece	30.00 W / piece
PCB material	Aluminium
Environmental	
Operating temperature	-20 ~ +60 °C
Storage temperature	-40 ~ +80 °C
IP class	IP 64
Directives - standards - certificates	
Directives	RoHS CE
Safety standards	EN60598-1 EN62031 IEC62471
