LuxaLight Industrial LED Fixture Transparent cover Deep Red 660nm 24.2x16mm (24 Volt, 2835, IP64)

LF-24-660-24.2X16-TC

Version: 2025-03-28.1

KvK-nummer: 57580561 BTW-nummer: NL852642209B01 IBAN: NL87 INGB 0007 8159 75 BIC/SWIFT code: INGBNL2A Email: info@luxalight.eu Website: www.luxalight.eu Tel.: +31 (0)40 - 202 49 04

## **Product description**

The LuxaLight Industrial LED Fixture is designed for intensive industrial applications that require high radiation intensity for a wide range of processes, including material curing, biological research, and more. With a wavelength of 660nm, this LED fixture provides a reliable and efficient solution for processes that benefit from deep red light, such as plant growth stimulation, tissue regeneration, and more.

The LED fixture is equipped with a silicone coating on the PCB, offering extra protection against moisture, dust, and other environmental factors. The transparent cover not only protects the fixture from mechanical damage but also allows the 660nm wavelength to pass through effectively for maximum performance and reliability.

#### **Key Features:**

- 660nm Wavelength: The 660nm wavelength is ideal for applications that require deep red light, such as horticulture, biological research, and specific industrial processes.
- 24V Power Supply: The fixture operates on a reliable 24V power supply, ensuring stable and consistent operation, perfect for demanding industrial applications.
- Silicone Coating on PCB: The PCB is coated with silicone to protect against environmental factors like moisture and dust, ensuring durability in harsh industrial environments.
- Transparent Cover with Mechanical Protection: The cover provides mechanical protection against physical damage while allowing the 660nm wavelength to pass through effectively, ensuring maximum performance and reliability.
- Integration with MaNima Pollux Industry Pulsing (Strobing): The LED fixture supports integration with the MaNima Pollux Industry System for pulsing (strobing), significantly increasing radiation intensity. This feature allows for faster reactions and improved efficiency in industrial processes.
- Real-Time Temperature Monitoring via NTC Sensor: The integrated NTC sensor ensures continuous temperature measurement and adjustment through the MaNima Pollux Industry System. This maintains the optimal operating temperature for maximum radiation output and consistent performance.

#### Applications:

- Horticulture & Agriculture: The 660nm wavelength is highly effective in stimulating plant growth, making it ideal for greenhouse environments and other agricultural applications where plant health and growth are critical.
- Biological Research: In scientific and medical fields, 660nm light can be used for applications such as promoting tissue regeneration, cell cultivation, and photobiomodulation therapy (PBM), which can aid in pain reduction and wound healing.
- Medical Therapy: 660nm light is used in phototherapy treatments, including skin healing, anti-aging treatments, and muscle recovery, leveraging the benefits of red light to stimulate cells and tissues.
- Food Industry: The 660nm wavelength can be used for applications such as the stimulation of growth in food production environments or in the pasteurization process of certain food products.
- Industrial Material Curing (Non-UV): The deep red light is used for curing certain types of coatings and materials that respond to red wavelengths, ensuring effective and rapid curing processes in industrial settings.
- Cosmetic Industry: The fixture is ideal for applications in the cosmetic industry, where red light is used for skin treatments such as reducing wrinkles, improving skin tone, and promoting collagen production.

#### **Benefits:**

- High Radiation Intensity: The ability to pulse with the MaNima Pollux Industry System allows radiation intensity to be significantly
  increased, resulting in faster reactions and increased productivity.
- Real-Time Temperature Monitoring for Consistent Performance: The NTC sensor, combined with the MaNima Pollux Industry System, ensures continuous temperature measurement, helping to maintain the optimal operating temperature and preventing overheating, which prolongs the LED's lifespan and improves efficiency.
- Industrial Durability: The silicone coating on the PCB provides extra protection against dust, moisture, and other environmental
  factors, making the fixture resistant to the challenges of heavy industrial environments.

 Efficiency and Speed: The LED fixture provides sufficient power for fast and efficient performance, which is essential for industrial production systems that need to process or cure large volumes of material quickly.

# **Technical specifications**

General			
Brand	LuxaLight		
Application	Barcode Scanning Machine Vision		
LED type	2835		
Material	Aluminum	Aluminum	
Dimensions	220 × 24,2 × 16 mm	220 × 24,2 × 16 mm	
Mounting	Surface mounted		
Warranty	5 years		
Cover type	PMMA transparent		
LEDs per piece	108.00		
Lifetime	70000 hours		
Lighting		<u> </u>	
Wave length	660 nm		
Beam angle	120 °		
LB waarde	L80B50		
Measurement results

#### Illuminance

Value	Measuring distance
38,5 klux	50 mm
18 klux	75 mm
12,3 klux	100 mm
3,7 klux	200 mm
1,9 klux	300 mm
1,2 klux	400 mm
0,8 klux	600 mm

- By combining Pulse Mode with Real-Time Monitoring, the efficiency of LED systems can be increased,
- resulting in higher output.

   We have the expertise and equipment to perform measurements tailored to the specific requirements of the application.

## **Electronics**

Working voltage 24V

Current per piece 1.25 A / piece

Power consumption per piece 30.00 W / piece

PCB material Aluminium

Pinout

Symbol	Function
V+	V+
GND	Ground
NTC	NTC sensor
NTC_GND	NTC ground

NTC parameters Resistance: 5000 Ohm

Beta value: 3950

## Environmental

-20 ~ +60 °C Operating temperature Storage temperature -40 ~ +80 °C

IP class IP 64

## Directives - standards - certificates

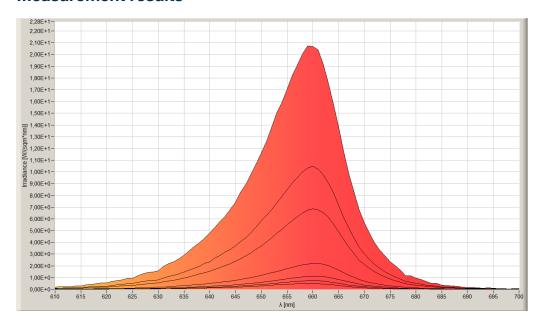

RoHS CE Directives

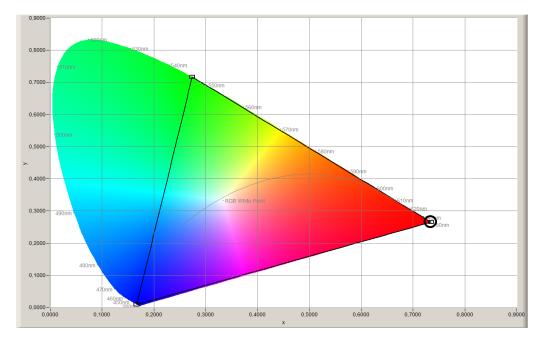

Safety standards EN60598-1

EN62031 IEC62471
